JUNIOR FULL STACK DEVELOPER · JAVA · SPRING BOOT · REACT

PROFILE

Full stack developer trained in the **Full Stack Web Development with Java** programme (576 h). I build complete applications: **Java backends with Spring Boot and SQL**, Node.js APIs, **React and TypeScript frontends**, and Python whenever something needs automating. I test what I build (JUnit, Vitest, Playwright) and ship it with continuous integration. Looking for my first developer role, on-site in Tarragona, hybrid or remote.
